

Table of Contents

Special Section: Microseismic

- 820**.....Introduction to this special section: **Microseismic**, J. Rutledge and J. Shemeta
- 822**.....**High-resolution microseismic imaging**, V. Grechka, Z. Li, B. Howell, H. Garcia, and T. Wooltorton
- 829**..... **Utilizing multiplets as an independent assessment of relative microseismic location uncertainty**,
A. Hakso and M. Zoback
- 837** **Hydraulic-fracturing-induced strain and microseismic using in situ distributed fiber-optic sensing**,
M. Karrenbach, D. Kahn, S. Cole, A. Ridge, K. Boone, J. Rich, K. Silver, and D. Langton
- 845** **Geomechanical lithology-based analysis of microseismicity in organic shale sequences: A Pennsylvania
Marcellus Shale example**, E. Zorn, R. Hammack, W. Harbert, and A. Kumar
-
- 852**.....**Azimuthal AVO inversion of an elliptic orthorhombic medium**, D. Cho, K. B. Rasmussen, and E. Mutual
- 858**.....**Geophysical Tutorial: Colored inversion**, M. Blouin and E. Gloaguen
- 862**.....**Conference Review: Strong technical program drives successful URTeC**, S. Maxwell

Departments

- 798**Editorial Calendar
- 800**President's Page
- 804**From the Other Side
- 806**Honors and Awards
- 864**Reviews
- 866**Board Report
- 868**Membership
- 870**Meetings Calendar
- 872**Interpreter Sam
