## Special Section: Unmanned autonomous vehicles

- 550.....Introduction to this special section: **Unmanned autonomous vehicles**, J. W. Lane and J. B. Stoll
- 552.....**The potential of rotary-wing UAV-based magnetic surveys for mineral exploration: A case study from central Sweden**, A. Malehmir, L. Dynesius, K. Paulusson, A. Paulusson, H. Johansson, M. Bastani, M. Wedmark, and P. Marsden
- 558.....**Marine seismic acquisition with autonomous marine vehicles towing 3D sensor arrays**, N. Moldoveanu, P. Caprioli, B. A. Kjellesvig, M. Ishak, M. Beecher, L. Mulisheva, and S. Pai
- 566.....**UAV-based LiDAR acquisition for the derivation of high-resolution forest and ground information**, F. Morsdorf, C. Eck, C. Zraggen, B. Imbach, F. D. Schneider, and D. Kükenbrink
- 571.....**Mapping slow-moving alpine landslides by UAV — Opportunities and limitations**, S. Rothmund, N. Vouillamoz, and M. Joswig

- 
- 580.....**Long-period, long-duration seismicity observed during hydraulic fracturing of the Marcellus Shale in Greene County, Pennsylvania**, A. Kumar, E. Zorn, R. Hammack, and W. Harbert
- 588.....**Interpreter's Corner: Cross-equalization and prestack seismic inversion of time-lapse land seismic data, Central Thrace Basin, Turkey**, S. Baytok, B. Selek, and H. Özdemir
- 598.....**Workshop Review: Next-generation marine seismic sources: A report from the SEG 2015 postconvention workshop**, J.-M. Mougénot, S. Griswold, M. Jenkerson, and R. Abma
